STAGE SPECIFICATIONS

Please note the fire curtain location, which must remain clear of equipment and staging so as to not block the curtain coming down completely. Cables and other low-profile items may cross this line, as long as it will not interfere with the fire curtain's intended purpose.

Travelers are located downstage of the fire curtain and 4' from the upstage wall. There is no midstage drape or rigging. This is a rental item when absolutely necessary. The 2 electrics are the only items that move over the stage.

Note that there are no in-house risers. Any staging, platforms, etc. is by request.
